NEW-YORK WEEKLY TRIBUNE, VERY LARGE PAPER, FOR THE COUNTRY, IS FURLISHED EVERY SATURDAY HORNING.

THE TRIBUNE.

Thirteen Days Later from Europe. Arrival of the Great Western.

Thesteamship Great Western, Capt. Matthews, srived at this port a little before 7 o'clock on Saturday evening, in fourteen days from Liver pool. She has London dates to the 16th and Liverpool to the 17th, inclusive. She brought 133 passengers.

The news is of varied though not intense in

The Cotton Market stands as at the last advices-with an active demand and large consymption, but so heavy a stock that no advance can be realized. Indeed, the tendency was rather in favor of buyers, though no shade of decline

Queen Victoria gave birth to a son on the 6th, who will of course be Duke of York. Mother and child are doing well Mehemet Ali has abdicated the throne o

Egypt in favor of his son Ibrahim, and is going on a pilgrimage to Mecca. Joseph Bonaparte is dead. Also, the Grand

Duchess Alexandria of Hesse, daughter of the Emperor of Russia. An election recently took place for a Member of Parliament for Dudley. Mr. Benbow, Con-

servative, beat Mr. Rawson, anti-Corn Law, by Brunswick, it is stated, will withdraw from

the Zoll Verein on the 1st of January next. The Abolition of Imprisonment for Debt took

effect in England on the 9th. A number of debtors owing less than \$100 were liberated on that day. The English Crops are very good. There will be no considerable demand for Grain from

this country. Washington Irving is in Paris, and is about to visit London.

Tangier has been severely bombarded by a French fleet under the Prince de Joinville. It was thought that this would end the scuffle between

France and Morocco. The King of Saxony has gone home from England. The Prince Royal of Prussia is now visiting there.

The Queen is confidently expected to visit Ireland next Summer.

Nothing new has transpired in Ireland, nor with regard to O'Connell.

ACCOUCHMENT OF THE QUEEN .- Queen Victoria was safely delivered of a son, at Windsor Castle, at ten minutes to S o'clock on the evening of the 6th inst. The Ministers of State were sent for soon after six, but did not arrive until the actual birth had taken place. Her Plajesty, at the time of the sailing of the steamer was "as comfortable as could be expected.

be expected."

BIRTH OF A FRENCH PRINCESS.—We are happy to state that the Princess de Joinville was at hait past 12 last night, safely delivered of a Princess, at Neully. Her koyal Highness and the infant Princess are both going on favorably. It is a curious coincidence, that this is the anniversary of the Prince de Joinville's birth day. He enters to-day on his 75th year. The Prince is to be promoted to the rank of Vice Admiral on his return from Morocco.

But before parting, the leader of the Opposition and the Premier had a sparring match about their respective paraceas for the ills of the country. Lord John Russell contended, of course, that his prescription was the only one for "restoring the patient to sound and glad to find that upon a recent occasion the Government have assumed a tone such as became them, and that the minister is pledged to a demand of ample reparation for the outrage offered to a British subject. It is impossible that the Government should recede from the ground which they have taken; but of what icfinite consequence it is that, being doier-mined to maintain that high position, you should encompass yourself with all the securiors which that position requires, and that you should seek in the affections of an gallant and forgiving people a better conjugat them any which the martello towthe only one for "restoring the patient to sound and pristine health," while Sir Robert Peel declared, in substance, that his rival was a quack, and that he alone, of all men, possessed the charm for making "all right" again. EXECUTION.—William Saville, the murderer, was executed at Nottingham on the 7th inst., when a fatal accident happened among the great crowd assembled to witness the hanging. Just after the prisoner was turned off, a rush of the crowd took place, and a number of persons were forced down a narrow avenue that leads to the street in which the execution had taken place. This avenue is a very steep descent, called Garner's Hill, and at the top are three or four steps. The persons who were forced down feil on the ground, and the others were pushed over them. These who had fallen were Judgment in the case of the traversers will be given on the 2d proximo; and although it is generally understood that it will confirm the proceedings in the Irish Court, much will depend upon the opinions which the Judges may entertain with regard to the proceedings connected with the mouster trials, whether any portion of Mr. O'Connell's term of in-carceration will be curtailed. The Government is much more auxious to come to terms with Mr. O'Connell than he is with them.

The Hibernia steamship arrived out on the morning of the 13th. The packet ship, Montezuma arrived out on the 7th, the Roscius on the 17th. On Wednesday, the 7th instant, the greater part of the village of Lower Phorne, near Gravesend, was

destroyed by fire.

Information has been received of a dreadful hur tienne having visited the different ports on Saturday and Sunday, the 34 and 4th insts., attended with a great sacrifice of life and property.

MUNDER OF AN AMERICAN CAPTAIN ON THE HIGH SEAS.—The Thomas Bennett, a vessel on her voyage from Liverpool to Charleston, S. C. whence she sailed on the 3d inst. returned on the 14th, in consequence of the murder of the captain by the cook. She had been out five days when the melanchuly event occurred, but had only reached the Bay of Biscay, when the chief mate put back, and on arrivat the murderer, a fine looking tellow named John Kent, was apprehended and piaced in confinement. It appears that Captain Halsey, the commander of the vessel, though generally a very sober man, had been under the influence of potent draughts from the time he put to sea. The meeting of the Repeal Association at Dublin on the 5th inst. was, as usual, sumerously attended. Daniel O'Connell, Jr. announced the continued good health of the imprisoned martyrs, and handed in various sums of money. He farther stated that his father disapproved Mr. Shiel's speech in Parlia-ment on the result of the State trials.

P. moved the adoption of an address to the Queen, praying that she would liberate Mr. O'Connell, who is stated in the address to be "Her Mejesty's most illustrious subject" and "the greatest man of the age." The adoption of the address was seconded by Henry Grattan, Esq. who stated that it had received 1,634,938 signatures. Mr. Smith O'Brien announced the amount of subscriptions to be £946 17s. for the week, and the meeting adjourned. Mr C. Powell, M. P. moved the adoption of an exercise even in her own apartments, as she is quite lame. It is said she sprained her foot dancing will her difficulty of moving is owing to her being swol-len in an extraordinary manner, particularly in her legs. SIR R. PERL—Sir: I gave notice that I should to day move the adjournment of the House. I now, therefore, propose to move that this House, at its rising, do adjourn till the 5th of September.

Mr. Shril: The Government have adjourned in stead of proroguing the House, because they wished that the Judges should give their opinion before next February upon a case of great political importance and judicial doubt. It is felt that it would ave been detained its. a monstrous injustice that Mr. O'Connell should have been detained infprison for nine months, in the least of the ljudges being of opinion that the imprisonment was originally illegal. But it does not follow from the control of the Bishops was on the control of the Bishops was one of the low from the admissions made by the Government themselves, that if a detention of Daniel O'Connell for nine months would be an outrage—the detention for three months is an injustice, less flagrant, inor nine months would be an outrage—the detention of the mouths is an injustice, less flagrant, ineed, but of a gross and most lamentable kind. ABDICATION OF MEHLMET ALL.—We have received the following intelligence by express. It reached Paris by telegraphic despatch on Tuesday:

"Alexandria, July 17.

"His Highness, the Viceroy, has just suddenly left Alexandria, declaring that he renounces forever Egypt and public affairs, and that he retires to Mecca." Mecca.

"Ubrahim is at Alexandria. The city is quiet."

The announcement that the Pacha intended "to retire to Mecca" looks as if the old man had thoughts of preparing for his final pilgrimage. The contributions to the national fund have quadrupled, the whole body of the Catholic Clergy is mershaled against you, and in the metropolis of Ireland is assembled a confederacy, not elected by the people, but the faithful representatives of their feelings, and which you have no law, and no contrivance of lawyers to enable you to put down. The imprisonment of O'Connell, therefore, has only aggravated what you regard as the evils of Ireland. You deceive yourselves if you imagine that you can conciliate the people, as long as you expect that such a bill as that to regulate charitable donations will be attended with salutary effects upon the public mind. They are warranted to run ene pers with care winding and to keep good time, and are now for sale at 69 Fifthen street. New York:

The motion is produced by weights in the 30 day clocks, and by a main spring wound upon a fuse in the year clock. The power of the weight or spring is retarded in this clock, and made to retain rectifaity in its motion by the incremous armagement of the escapement and pendulum. When you look at the clock, you perceive a gift ball four and shall inches in dampeter, at the end of a small stael rod. It revolves three times and a heli one way, and the same number of times the other. At the upper end of the rod is an ingestion and delicate double lever movement, reaching to the escapement, which is exclusive and leaves without any sensible friction. The spring then reject upon the ball, indeed by its own gravity, and the rod irm, as in other clocks. This ball is hollow and has an internal apparatus, by which its rotary motions reculsated.
